EDUCATION

Senior Year Bachelors In Computer Science

National University Of Computer And Emerging Sciences (FAST)

08/2017 - Present

Courses

- Machine Learning, Web Development, Database Systems

O-Levels & FSC

Crescent School

08/2012 - 08/2016

Lahore

WORK EXPERIENCE

Freelance Developer

Fiverr

12/2018 - Present

Achievements/Tasks

- I have completed a milestone of 200+ orders and 190+ 5 star and is working as level 2 seller.
- Also, I have been working as professional web scrapper and automation engineer for many of my permanent and returning clients. Within this domain I have scrapped around 60+ open source websites to get valuable marketing data for my clients. Websites include: Facebook, Instagram, Zoopla, Aliexpress, Amazon etc.
- Moreover, I have worked as a data analyst to analyze and present data through live visualization using dash and power bi. Also, made machine learning projects like predictor and analyzer.
- I am currently managing multiple database for my client's websites which include both SQL and NOSQL databases.
- In addition to that I have also developed and deployed number of websites for few of my clients worldwide.

Technology Intern

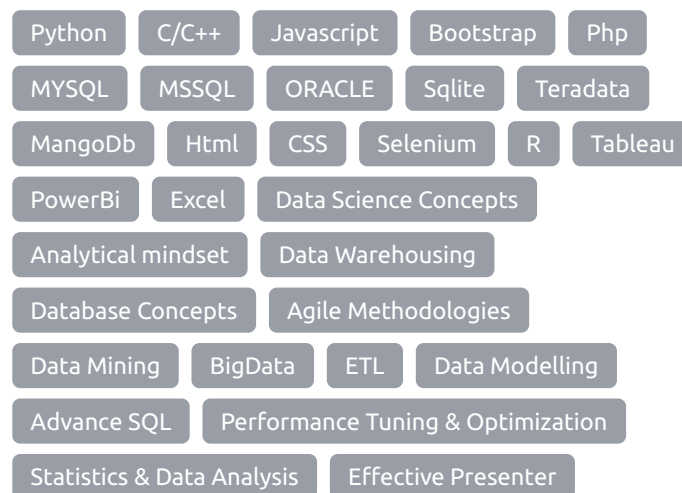

Arthan

03/2021 - 05/2021

Achievements/Tasks

- I worked on data mining, data analytics and lead generation in close contact with company on various projects. It was a learning curve for me to understand importance of team work and to utilize my skills proper so I can benefit the company effectively.
- Using my knowledge of python and data mining techniques I was able to benefit the company in number of confidential projects.

SKILLS

PROJECTS & ACHIEVEMENTS

Hospital Booking System (01/2021 - 02/2021)

- Website developed to book appointments for patients using bootstrap and PHP.

Facebook Comments Analyzer (02/2021 - 03/2021)

- Developed a bot which scrapes data from Facebook to analyze different reactions and comments done on different pages.
- Core purpose was to analyze the emotions of audience and give each post response in csv file.

Custom Network Simulator (02/2021 - Present)

- A customer network simulator for WIFI (mac layer) which is tailored for machine learning. It generates data using different simulation criteria, extracts data, visualize results and put in machine learning model.

Live Analytics Admin Panel (04/2021 - 05/2021)

- I developed admin panel to control store transactions and show current performance through interactive graphs from live data of firebase using dash in python

Every Website Email Scrapping Tool (02/2020 - 03/2020)

- A GUI based tool which uses qt to scrape the emails from any website using selenium in python

Resume Parser (04/2021 - 04/2021)

- Developed a resume parsing tool which extract email, name and phone from pdf based resumes. Developed in python using spacy.

CERTIFICATES

Google Data Analytics Certificate (06/2021 - 06/2021)

Certified Web Developer (04/2021 - 04/2021)

Neural Network Deep Learning (03/2021 - 03/2021)
