Summary

OBJECTIVE

Last year of computer science with experience working across freelancing industry like fiverr and freelancer. I've built quite a few projects by myself and I'm looking for a role where I can grow and learn from other experienced team members. I would suggest to visit my website mentioned above for better understanding.

Experience

Web Specialist

Dec 2018 - Present (2 years 6 months +)

Developed multiple scrappers for many international clients which ran both on local machine and on AWS. Got chance to bypass captchas by rotating proxies and using fake user-agents.

· Was involved in designing, optimizing and creation of databases along with projects which involved analyzing data using python and sql.

· Managed to get 5 star 100+ reviews from all across world.

· Used: Selenium, Beautiful Soup, Scrappy, Python, Mysql, MS Sql, MangoDb, Oracle, PostgreSQL

Developer

I was able to build a amazon seller scrapper with rotating IPs.

· Scrapper has ability to scrape the product details as well as seller details. I further on expanded it to include a GUI in QT

· Used: Python (selenium)

Law Database

Scrapper & Database Manager

I was responsible for scrapping Australian law websites. It included 40+ websites. After scraping process I developed a system for my client; so, data can be scrapped automatically after every month and put into the database. Used: Python (selenium), Postgres

Education

National University of Computer and Emerging Sciences

B.S, Computer Science

Skills

Python (Programming Language) • Pandas (Software) • Selenium • Beautiful Soup • MySQL • Microsoft SQL Server • Oracle Database • Databases • SQLite • PostgreSQL
